**Subject :-** Workshop at Nagpur on subject "Construction and Design Aspects of Precast Pretension concrete pavement" on 16<sup>th</sup> January, 2018.

Dear Sir,

Public Works Department Nagpur has taken a lead in doing a trial stretch with technology of precast pretension paneled concrete road on inner ring road of Nagpur owned by us. We had taken Advice of Dr. Mehadi, Pavement Specialist of CALTRON, USA during his visit to Nagpur in may 2018 Dr. Sonparote, Assistant Professor VNIT was also involved in design which was checked and approved by Dr. Mehadi The technology involves casting of pretension panels and placing the same on pre prepared base. We have already casted few panels to suit our traffic requirement One of the most critical part in this technology, is placing panels in proper line and level. We have therefore invited Dr. Mehadi to give detailed guidelines and other important construction aspects including demonstration at site. He has agreed to come to Nagpur on 14th January 2019. The technology has several advantages and can prove ideal in our country.

I would therefore request you to keep a workshop at Nagpur on 16th January 2019 on subject of "Construction and Design aspects of precast pretension concrete pavement". The workshop would include lecture by Dr. Mehadi Pavement Engineer, CALTRON, USA and other experts and also field demonstration Public Works department will do all arrangements for success of the workshop Staying arrangements can be made at Govt. Guest House Ravi Bhavan/MLA hostel for which participants can contact Mr. J.V. Bhanuse, Executive Engineer, P.W. Dn. 1, Nagpur (9422860674). Participants can pay as per Government rates.
